

CUI BONO.
What is hope? A smiling rainbow
Children follow through the wet;
The rainbow, still, meters the day;
Never arching found it yet.
What is life? A thawing iceberg
On sea with sunny shores;
Gone, we sail, it melts beneath us;
We sink, and seen no more.
What is man? A foolish baby,
Vainly strives, and fights, and frets;
Demanding all, deserting nothing;
One small grave is all he gets.
—Charles Carlyle.

FACTS FOR FARMERS.

A correspondent of the Country Gentleman, in giving advice how to get rid of the cabbage-worm, says that he has saved his plants for two years by keeping them and pouring it on after they begin to head, only two applications were necessary. This season, he says, the millers commenced depositing their eggs before the cabbage began to head, and he gave them a dose over two weeks ago, and there has been no signs of any worms since.

One of the first things necessary in the education of a child intended for a farmer is the cultivation of the eye. The eye must be trained to see the difference between the good and the bad. This is done by the use of the microscope. The eye must be trained to see the difference between the good and the bad. This is done by the use of the microscope.

The use of implements of husbandry of imperfect construction, or in bad condition, is a constant source of trouble to the farmer. It is a constant source of trouble to the farmer. It is a constant source of trouble to the farmer.

A correspondent of the Western Rural says he has cured apple-tree blight as follows: As fast as the young twigs are seen to die, cut off below the green leaf next to the dead one. This is done by the use of the microscope.

Cotton Growing Under Carpet-Bag and Under Democratic Rule.
An eminent German-American publicist, Joseph Pulitzer, in a recent pamphlet, published by Mr. Edward Atkinson, of New England, political economist, said:

Over one-third of all our exports are raised in and by the South. According to the most eminent Republican statistician in the country, Edward Atkinson, of Boston, the value of the cotton crop of the South was not less than \$2,500,000,000, and probably \$3,000,000,000. Two-thirds of this has been exported, which means that for one single staple produced by the South during the last ten years this country received the enormous sum of \$2,500,000,000 in gold, or more than the entire national debt of the United States.

That this was largely due to operations of regained self-government is shown by the single fact that while the cotton produced in the four years 1865 and 1866, amounted to about \$2,500,000,000, in the years 1874, 1875, 1876, 1877, and 1878, it amounted to over \$3,000,000,000, or absolutely more than twice as much—an increase of over 100 per cent—an addition to the national wealth in four years alone from a single staple of \$5,000,000,000, as the difference between Republican and Democratic rule. You look at any Republican Almanac you will see that of the \$2,500,000,000 of agricultural exports between 1865 and 1873, the value of the cotton crop of the South alone amounted to about \$1,500,000,000. If you believe that eminent Republican Mr. Atkinson, the value of the cotton crop of 1878-79 was, as I said before, about \$3,000,000,000.

A writer who knows what he is talking about, says one of the indications of a lamentable fault in our educational system is that it leads you to believe that there are easier and more respectable ways of doing things than by following nature. This need not necessarily be so. The fact is, that the chances of succeeding in the country are greater than in the city. The trouble is, that few, if any, will believe this. With the boy, seeing the world as a city, and with no teachings will be listened to except those of experience. From statistics we learn that only one out of a hundred in a city are able to do anything, and that the proportion who are successful in saving fifty thousand dollars or more, do not exceed one out of every two thousand. If one of the able-bodied young men and young women in the city would leave it and go into the country and engage in agriculture, no legislative body of business would suffer. We should have more producers and a less number of exchange of products, and our country would be better off.
